PHP APPLICATION DEVELOPER

A PERMANENT POSITION BASED IN BRIDGWATER, SOMERSET.

We are recruiting PHP developers to join our growing team to primarily work on our in house eCommerce and Inventory management platform and associated products, but also on client work ranging from basic websites through to bespoke web applications.

Rocket Commerce Ltd is a growing web application development company specialising in all things eCommerce and inventory management. Our primary business is software but we also offer other related services to our eCommerce clients including, email marketing and online product advertising. We also offer warehousing and order fulfilment giving us the ideal environment to test and develop practical inventory applications.

This position is ideally suited to an enthusiastic individual who has strong coding ability with experience of developing database driven web applications. The successful candidate will be able to demonstrate their working knowledge of current web technologies, development tools and be capable of working to tight deadlines at a high standard.

ROLE

- Develop and maintain our inventory driven eCommerce platform
- Design and manage bespoke client web applications
- Work closely with colleagues in an agile development environment
- Manage new projects assigned to you and to contribute to ongoing projects
- Provide occasional support to other areas of the business as and when required

ESSENTIAL QUALITIES

- Skilled in object orientated PHP development
- Fluent in front end development (HTML, CSS, Javascript, jQuery)
- Experience designing and utilising MySQL databases
- Source code management (Ideally comfortable with git)
- Knowledge of MVC frameworks

DESIRABLE QUALITIES

- Experience of working on eCommerce applications
- Working experience of other server side languages
- Test frameworks and writing of unit tests
- Proven ability using JSON and REST APIs
- Server administration and infrastructure knowledge
- WordPress customisation
- Comfortable with retailing and basic accounting terminology and business processes
